

# Chemical Analysis Report

Set ID # 511022

Set Description : 1 lot of tablets  
Date Received : 11/04/05  
Date(s) Analyzed : 11/05/05 thru 11/06/05  
Date Reported : 11/09/05

Directed To : Orphanos  
Address : Steve Orphanos

## Sample Preparation and Analysis Conditions :

For oxandrolone, a weighed portion of a composite of ground tablets was dissolved/extracted in 1:1:1 – acetonitrile/methanol/water, filtered, and then analyzed under the following instrumental conditions:

Chromatograph : High performance liquid chromatograph (Hewlett Packard Model 1090 II / L)  
Column : Synergi Hydro-RP, 150 x 3.0mm, 4µm, 80Å  
Detector : Photodiode array, scanning from 190 to 600 nm; quantitation at 200 nm

## Analytical Results

Reporting results to three significant figures is for statistical evaluation only  
and is not intended to be an indication of analytical precision

Sample Identification		Tablets	Oxandrolone	
		ave. wt. g	mg/g	mg/tab
Laboratory ID#	511022-1	0.0624	240.	15.0
Client ID#	Pink tablets
